

Course Outline

Palo Alto Networks: Panorama 10.2: Managing Firewalls at Scale Course PAN-EDU-220: 2 days Instructor Led

About this course

New - Learn how to configure and manage the Panorama Management Server. This course will help students to gain in-depth knowledge about how to configure and manage their Palo Alto Networks Panorama management server. Administrators that complete this course will become familiar with the Panorama management server's role in managing and securing their overall network. Network professionals will be shown how to use Panorama aggregated reporting to provide them with a holistic view of a network of Palo Alto Networks next-generation firewalls.

Audience profile

- Security Administrators
- Security Operations Specialists
- Security Analysts
- Security Engineers
- Security Architects

At course completion

After completing this course, students will be able to:

- Learn how to configure and manage the next-generation Panorama management server
- Gain experience configuring templates (including template variables) and device groups
- Gain experience with administration, log collection, and logging and reporting
- Become familiar with planning and design considerations for Panorama deployment

Course Outline

- Module 1: Initial Configuration
- Module 2: Adding Firewalls
- Module 3: Templates
- Module 4: Device Groups
- Module 5: Log Collection and Forwarding
- Module 6: Using Panorama Logs
- Module 7: Panorama Administration Accounts
- Module 8: Reporting
- Module 9: Troubleshooting
